

# Revision History for ConvexOS V10.2

December 9, 1992

Document No. 710-003430-047

This document describes the relationship between the ConvexOS V10.2 and ConvexOS V10.1 releases. This document also describes the upgrade instructions that are applicable to the ConvexOS V10.2 Kernel and Base Utilities Update and a revision history of the ConvexOS V10.2 components.

ConvexOS V10.2 is a C3800 specific release that provides Automatic Processor Recovery functionality. Other than this, it is identical in functionality to ConvexOS V10.1. In addition to a ConvexOS V10.2 Kernel, a ConvexOS Base Utilities Update V10.2 is supplied.

When installed over the ConvexOS V10.1 Utilities, functionality identical to the ConvexOS V10.1.2 patch is supplied except for APR-specific functionality. Therefore, any patches to ConvexOS Utilities V10.1 beyond V10.1.2 should also be applied to a system running ConvexOS V10.2. Possible kernel patches should be individually evaluated.

The current revision level for the C3800 ConvexOS is V10.2. To bring a system up to the current revision level, follow the instructions in Table 1: Upgrade Instructions.

**Table 1: Upgrade Instructions**

Current Configuration	Install
ConvexOS V10.0	ConvexOS V10.2 ConvexOS Utilities V10.1.2 Base Utilities Update V10.2 Tape System V10.1.3

Table 2: ConvexOS Kernel V10.2 Revision History gives detailed information on the prerequisites, corequisites, and functionality of the patches. If you have any questions, please contact the Convex Technical Assistance Center.

This release is available for the Convex C3800 architecture only.

**Table 2: ConvexOS Kernel V10.2 Revision History**

Version	Part Number	Description
Initial Release (V10.2)	710-011015-010	The initial release of ConvexOS Kernel V10.2. This release is for the C3800 architecture only.

Table 3: ConvexOS Base Utilities V10.2 Revision History gives detailed information on the prerequisites, corequisites, and functionality of the patches. If you have any questions, please contact the Convex Technical Assistance Center.

**Table 3: ConvexOS Base Utilities Update V10.2 Revision History**

Version	Part Number	Description
Initial Release (V10.2)	710-000215-003	The initial release of ConvexOS Base Utilities Update V10.2.  This release is for the C3800 architecture only. When installed over ConvexOS Base Utilities V10.1, it provides functionality identical to ConvexOS Base Utilities V10.1.2 with the addition of APR specific support.  This release is for the C3800 architecture only and has the same pre-requisites as the ConvexOS Base Utilities V10.1.2
