## Conventions used in this Student Guide

---

### First a note on the style of this Course

There are exercises throughout the course which have been designed to consolidate your learning of the topics of the course. Since you already have basic PlantScape Server and Station implementation skills the instructions for these exercises will not be as prescriptive as those you encountered in the course “Implementation - 1”. Be prepared to think!

---

### Team Number

Throughout the Lab Exercises in this Student Guide the symbol # has been used to indicate your team number.

For example, if you are in team 4 and are instructed to select the SP of point LT10#, you should select the SP of point LT104.

---

### Attention and Caution

Information worthy of special attention is presented in the following format:

**Attention**

Information written here

Information which, if ignored, could cause equipment damage or data loss is presented in the following format:
