> Al -

> The call I talked to you about yesterday from John Knott when he was at  
> a DOD site with io4120 failing subtests 5200 and above is a known bug to that  
> test. John called back today and said he talked to Dennis Maloney (maloney)  
> who said that error message is a bug in 6.5 of Sys Diags. It should be fixed in  
> the next release. I guess this is a good one for SIS and Tech Tips. The  
> following is the error message:

> libtest: SIGIOT received using SIGIOT to core dump

> Thanks  
> Chris

> Also - by the way - Apologies from the Tech Tip co-ordinator - you will  
> notice that the present release (12/31/89) of the Tech Tips does not  
> follow the COVER LETTER. The printers were kind enough to leave out  
> the blank sheet I had inserted after page 3 in GEN-011. So the following  
> fix is recommended:

1. Photocopy new page 53 and insert between old page 52 and new page 54.
  2. Photocopy old page 4 and insert between new page 3 and old page 5.
- n.b. - You will find new page 3 and new page 53 on the same sheet in the update package. Sorry for the inconvenience. I will provide a complete GEN-011 section with the Feb.28,1990 update package.
