

PRO/DATATRIEVE Installation Card

AV-X800A-TH

If you are using P/OS Version 1.7, install PRO/DATATRIEVE as you would any other Professional 350 application.

If you are using P/OS Version 1.5, you must install the Installation Utility for PRO/DATATRIEVE before you can install PRO/DATATRIEVE. To install the utility and PRO/DATATRIEVE, follow these steps:

1. Insert the diskette labeled PRO/DATATRIEVE Installation Utility V1.0 in a diskette drive and select "Disk/diskette services" from the Main Menu.
2. Select "Install application" from the Disk/Diskette Services Menu and install the utility on the Main Menu or on an Additional Applications group menu. You can keep the name "Installation Utility for PRO/DTR V1.0," or you can give the utility another name.
3. The installation takes about 30 seconds. When the installation is complete, press the MAIN SCREEN key to return to the Main Menu. Remove the diskette from the diskette drive and store it in a safe place.
4. Insert the diskette labeled PRO/DATATRIEVE V1.0 in a diskette drive and select the Installation Utility for PRO/DATATRIEVE from the Main Menu or from the Additional Applications group menu on which you installed it.
5. Install PRO/DATATRIEVE on the Main Menu or on an Additional Applications group menu. You can give PRO/DATATRIEVE another name, if you like.
6. The installation takes about one minute. When the installation is complete, remove the PRO/DATATRIEVE diskette from the diskette drive and store it in a safe place in case you have to reinstall PRO/DATATRIEVE at a future date.
7. Since you do not need the PRO/DATATRIEVE Installation Utility any longer, you may want to remove the application from your disk. To do this, select "Disk/diskette services" from the Main Menu and "Remove application" from the Disk/Diskette Services Menu to remove the installation utility.
